

To Do AND NOT To Do!

ALPHA MOVE
WE RELOCATE PEOPLE

Packing Restrictions

We at ALPHA MOVE want to make sure all our moves are safe and in compliance with governmental regulations.

This fact sheet was created to warn our customers of the dangers that can arise from packing certain common household products for shipping, as well as to inform that federal law prohibit the packing of hazardous and restricted items in any shipment.

Many common household items, including aerosol hair spray and cleaning products, are very hazardous when packed. Heat quickly builds up inside the containers, which can trigger an explosion or fire that can not only cause serious damage to a shipment, but endanger the lives of passenger/transporters as well. ALPHA MOVE's agents are ordered not to pack or load any articles that are considered hazardous or restricted. Therefore, for everyone's safety, please make sure none of the items on our partial list below, are packed in a shipment to be moved.

Please carefully review the list below and eliminate all dangerous items before packing. Because violators are subject to up to \$500,000 in fines and/or 5 years in prison, ALPHA MOVE and their agents are authorized to remove these items if they are packed by customers. If removed, these items are not claimable on insurance. Please notice, that customers are responsible for all charges not following these regulations. In addition, make sure to be aware of the destination country's custom guidelines for prohibited items (i.e. food items, adult materials, electronics, etc.) when packing.

Combustible Liquid

- Alcohols (rubbing)
- Lubricants (motor oils)
- Antifreeze compounds

Explosives

- Fireworks
- Flash Bulbs
- Small arms ammunitions

Compressed Gas

- Aerosol cans
- Fire extinguishers
- Scuba diving tanks

Corrosives
